**SUPPLEMENTARY INFORMATION:**

**I. Discussion**

Based upon the application dated August 12, 2010 (ADAMS Package Accession No. ML102360313), as supplemented on February 1, 2012 (ADAMS Accession No. ML12234A537 and ML12234A539), February 16, 2012 (ADAMS Accession No. ML121590502), November 18, 2014 (ADAMS Accession No. ML14353A323), December 9, 2014 (ADAMS Accession No. ML15040A602); April 10, 2015 (ADAMS

Accession No. ML15133A397); April 21, 2015 (ADAMS Accession No. ML16063A418); March 7, 2018 (ADAMS Accession No. ML18130A032), July 30, 2018 (ADAMS Accession No. ML18239A084), August 16, 2018 (ADAMS Accession No. ML18229A227 and ML18229A235), the NRC has issued a renewed license (ADAMS Accession No. ML18222A515) to PRI. The renewed license authorizes PRI to possess uranium source and byproduct material at Smith Ranch Highland and its associated satellite facilities. In addition, the license authorizes PRI to operate its facilities as proposed in its license renewal application, as amended, and as prescribed in its amended license. The renewed license will expire on September 26, 2028.

The licensee's application for a renewed license complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the NRC's rules and regulations. The NRC has made appropriate findings as required by the Act, part 20 of title 10 of the *Code of Federal Regulations* (10 CFR), and 10 CFR part 40, and sets forth those findings in the renewed license. The agency afforded an opportunity for a hearing in the "Notice of Opportunity for a Hearing" published in the *Federal Register* on September 19, 2012 (77 FR 58181). The NRC received no request for a hearing or petition for leave to intervene following the notice.

The NRC staff prepared a safety evaluation report (ADAMS Accession No. ML18193A540) for the renewal of the license and concluded, based on that evaluation, that PRI will continue to meet the regulations in the Act, 10 CFR part 20, and 10 CFR part 40. The NRC staff also prepared an environmental assessment (ADAMS Accession No. ML18257A071) and finding of no significant impact for the renewal of this license, which were published in the *Federal Register* on September 25, 2018 (83 FR 48461). The NRC staff concluded that renewal of this license will not have a significant impact on the quality of the human environment.
